Comments on 2022-R-A-0011: Low Emission Vehicle Program

Name: Stuart Brittingham

Phone: 4433590631

Email Address: stuartbrittingham@comcast.net

Organization: Freedom Loving Americans

Comments:

This issue should NOT be decided by a government agency. Nor, by an unelected official or officials. Our freedom is sacred and should NOT be taken from us in the manner being used. As free people, we should decide our own fate. This matter should be decided by Delaware citizens at the ballot box. Or, by the free market capitalist system. The consumer and manufacturer reacting to the needs and desires of product demand should drive the development of EV growth. We can't go back to the 1800's. Fossil fuel or nuclear energy is needed to supply the electricity needed. Solar or wind will never be able or dependable enough to supply the full demand for energy. The emissions will come from the power plants, unless we go total nuclear energy, if not from cars. The transition from fossil fuel to electric cars will happen organically. It already is occurring. Look at Tesla's success. Fossil fuel cars may never completely disappear. They become more efficient yearly. Why destroy our way of life and the economy by taking away our choice and freedom. Stuart Brittingham
