Comments:

This proposed law infringes on the rights and freedoms for citizens to have the right to choose how they wish to commute. With the present record setting inflation rises because of the worst president in US history Joe Biden incompetent administration and executive order decisions, now DNREC wishes to put more costs on the citizens. Ask anyone who has an electric vehicle how much it costs to replace the batteries in a vehicle. I guess the auto manufactures will replace them for free? Today's battery chemistry's only have a life of 4-5 years. Who gonna pay for that, what are you going to do with bad battery cells? The emissions that will be generated to manufacture and disposal of battery cells and to supply more electricity to the grid you are creating more pollution. This electric bus and vehicle proposals this state is proposing is big waste of money at the tax payers expense and proven not to be efficient enough under the present technology. All this electric vehicle proposals is just a big dog and pony show just so politicians can say they are saving the earth and going green. Meanwhile the rest of the world is polluting the world and laughing at the USA. I am in firm opposition to this socialistic law that our law makers are forcing on us.
