Organization: No

Comments:

While I am not opposed to EV's, I am strongly opposed to MANDATES. Especially those not from Elected Officials. America was born based on freedom and freedom is more important than any issue a bureaucratic government agency could try to "rule". Besides Delaware, nor the USA, are prepared and ready for the needs that EV's will place on us. GRid is ready. Will require more Electriciry, which comes from Carbon burning. Not proven that Carbon is so bad. Environmental crazies have predicted the end to our earth many times over, to happen years ago. Will require more minerals, which helps China, and which use more carbon to harvest, and which drive up poor labor conditions in developing countries. There is so much bad that would happen with this, and very little good. Please do not rule us with bad policy.
