Organization: Trails of Beaver Creek board of directors, secreta

Comments:

I am not in favor of mandating electric vehicles, so I oppose this regulation. However, I favor of all forms of alternative energy. The USA must be energy independent with environmental protection being forefront. The current offshore wind development is not taking into consideration the adverse sea life impact; and the EV mandate does not take into account the environmental damage and economic impact of China's use of forced child labor to mine the resources, nor their expanding coal driven energy consumption. The USA can lead in clean energy. Energy is freedom!
