Safety concerns, affordability and accessibility - installation of charging stations at residents if not done properly could lead to an increase in fires. How will folks that live in cities, apartments and other areas without garages and/or driveways charge their vehicles. Additional studies are needed. Alternative fuels should also be part of the mix. And gasoline n diesel vehicles should not be penalized. On the economic front affordability needs attention as well as impact on the economy switching over and decreasing income to those that rely on income from selling and manufacturing fuels.
