I would like to voice my opposition to this potential program being implemented by the the Legislature on this matter. It would be a beneficial situation not just in Delaware if this could be adopted and utilized in urban settings where the emissions from vehicles get trapped by buildings and such while not being filtered or dissipated by vegetation which is only used sparingly in these type of settings. It would also be easier to set up in infrastructure for it as well. Charging stations and upgrading the electrical grid to handle the increase in load on this system. So, if the plan is to implement this State wide and make it mandatory for every vehicle in the State to be EV style by a certain time frame that is to be determined; I am definitely opposed to this legislation.
