Comments:

The plan to go to electric vehicles is not environmentally better or more efficient. The technology available today is inadequate to support this change. All this will do is cause the cost of transportation to work and the delivery of products to become more expensive than the average person can afford. Delaware will lose businesses, jobs and industries. This will end up being a financial fiasco. We do not want to end up like the disaster that California is facing! It is time to put Delawareans first and not an agenda.
