Comments:

Delaware's internal combustion engine vehicles ban will hurt consumers, farmers, workers, and our national security. It's time to say no to California's ill conceived political car ban—in Dover and across the country. 73% of Delaware citizens are opposed to this legislation and or regulation. Why would government ignor the will of "We the People"? Where is the common sense thinking? This false political construct smacks of 'big government instilling fear into our people, in order to control them, This political constryct is based on politically paid, flawed CO2 data. There is NO manmade CO2 problem. In fact the planet needs more CO2 to feed plants that feed our growing worldwide population. The principal greenhouse gas we should be studying is H2O not CO2. Why hurt our poor citizens, business owners, farmers not to mention our national security, over a politically motivated fear construct that has no basis in fact? Why is the 'government', ignoring the negative impact of the entire alternative energy industry? Please study and research the real science instead of this political destructive fantasy. Do you want your grandchildred to speak Manderin Chinesse, have no freedoms, no liberty or the God given right to pursue happiness? For the love of our children and grandchildren, do not pass these distructive initiatives.
