Governor Carney,

Consider me AGAINST the proposed zero emissions mandate. I live in rural Sussex county and electric vehicles will restrict my freedom and ability to work. I am not going to list all the reasons because every one else has already told you what I believe.

I would only add that your support for this ludicrous idea reinforces your position that you are against rural tax payers, senior citizens, farmers, and underage children in other countries that are forced to work the mines that bring us the elements to make electric batteries.

Sincerely

Phil Taylor
