Comments:

Will the tracking of reaching the initial 35% within 2025 be made public.... so the public can see the 35% has truly been " met ? " That is.... so the public does not get duped ? Might the State Treasurer's office monitor DNREC ? AND... since the public continues to hear the real emissions issues actually hale from other states INTO Delaware, why are Delawareans being required to get on board with this DNREC policy ? This question really needs to be answered by DNREC.... and it seems DNREC cannot answer.
