Dear Governor and Committee,

I moved from MA to enjoy a wonderful way of life and this mandate is very disturbing to me.

I believe that the market should dictate what consumers want, pay, purchase as well as competition.

I also believe in small government which I hoped to find here.

Please **STOP** the needless mandate and let the consumer choose. No dictating to industry either.

If you want to improve climate issues, look overseas first.

My other concern is the destruction of environments we cannot "see" as it is overseas and the other issue is the child slave labor in the Congo mining these materials. If the Democrats, Progressives and climate change devotees are really concerned about the environment, there are several reasons to look deeper at the impact on our way of life that I mentioned.

I urge you to stop the mandate plan as it will cost ALL Delawareans their freedom, travel options and economic opportunity.

Please STOP the mandate.

Nancy

Millsboro - I vote.
