it seems like our governor wants us back in the early 20th century. I AM OPPOSED TO THE EV MANDATES for the following reasons

- 1- there is no nation wide infrastructure for electric vehicles
- 2- no one has ever told the public how much money it'll cost per mile to recharge an EV vehicle.
- 3- no one has ever told us what a EV will cost on average.
- 4- the utility companies, how will they meet the electrical demands if they can NOT use coal or oil. right now they are having trouble meeting demands on hot days
