Comments:

Absolutely not in favor of this proposal. Not only does this not reduce emissions as the energy being produced for the electricity is from burning fossil fuels, but it's not or governments job to tell citizens what lawfully made products they are allowed to purchase. This bill will only cripple our local, state and federal economy and send more US resources to countries that don't have American interests and safety in mind. The materials and products necessary for these vehicles cannot be mined or produced in our country because they are deemed unsafe! Stop this bill and this unsafe path you have us on!
