Comments:

From an environmental perspective this sounds wonderful but the reality of our State government mandating this form of transportation is wrong! I firmly believe that this is a personal choice... I choose to drive a "hybrid" car which is fuel efficient. If there is going to be a change in our driving selection in the State of Delaware, I believe that the pros and cons of all aspects of this mode of transportation should be presented to the constituents of Delaware so that this would be voted upon... let the populace choose their fate instead of our government forcing this issue into a reality. If given some thought by our legislators, there would be numerous ways to circumvent this mandated law. Simply, I feel that this attempt by our State government is illegal and is an attempt to reduce our freedom of choice.
My Best, John G. Howard
