Comments:

Rural Delaware is not ready nor will it be ready for this liberal agenda. Ev vehicles is just the beginning. With farmers unable to afford new equipment the food supply will become what is starting to be pushed, bugs! New Castle county maybe able to accommodate the charging stations until the first ice storm. The income from the neighboring states, PA., Maryland, New York to vacation at our beaches I hope would decline. The only good thing to happens from this action. The left is destroying thistle country, There is no restrictions on China to cut carbon emissions we just want to enrich them by going to ev's while this administration refuses to let us return to energy independence! This is just the beginning of government control of our lives! Though these comments by common sense residence will make no difference, at least like voting, I did my part and voiced my opinion.
