Comments:

This green agenda is not ready for the power grid in DE and US. It will take years to build a satisfactory grid to accommodate this electrification. The EVs are too expensive and China is benefiting from this because of the batteries THEY make! This little state of DE will lose too many jobs! It can't afford too. People will move and the loss of tax revenue will be enormous. You start taxing Delawareans to the hilt to pay for lost revenue, they will move too! If you place too much onus on businesses to change to the green agenda they will move or pass on expense to customers. This will have a net reaction to the detriment of Delaware. SLOWDOWN this green agenda. China/Russia love what the USA is doing on this Green agenda. They certainly will not fully comply. They want to build up their military and electrification will slow them down. For the sake of democracy in the world slowdown this green agenda!!!
