Comments on 2022-R-A-0011: Low Emission Vehicle Program

Name: Douglas B Canfield

Phone: 13025840991

Email Address: trapatg@comcast.net

Organization:

Comments:

As has been previously stated, the transportation sector is the largest source of greenhouse gas emissions in Delaware, accounting for 30 percent of the gross emissions, and 60 percent of these emissions from transportation come from passenger cars and light-duty trucks. Reducing air pollution and greenhouse gas emissions from the state's cars and trucks is vital to meet the States goals while also improving air quality and Delawareans' health. Also, surrounding states are adopting regulations to give their residents access to electric vehicles, that will be essentially denied to Delaware residents, if these regulations are not passed. I would strongly urge the implementation of this regulatory program. Respectfully submitted, Douglas Canfield
