Hello:

I want to go on the record opposing the EV mandate. This mandate forces us to have no choice in this matter or involvement by the elected body that represents the people of this State! This isn't practicable.

With this mandate, you will be clearly forcing the people into something they may not necessarily want or can afford, upsetting the balance by destroying the livelihoods and businesses of an unlimited number, and it undermines our bottom-line with our internal combustion vehicle(s) making them valueless.

Currently, I don't want an EV vehicle. It's prohibitively expensive and awkward coupled with range anxiety and forcing this onto the populace is unrealistic.

My wife and I currently own a hybrid and an internal combustion vehicle that fits our lifestyles. No matter how you look at this...this is insane and cruel!

Respectfully,

Frank J. Lobaccaro
