Comments:

Please do not adopt this regulation. I feel that you are overstepping your authority in requiring citizens to buy and operate electric vehicles only and overstating the threat to our clean air. Delaware is not California. I think the irresponsible rush to all ev will cause instability as we try to adjust to a technology without sufficient infrastructure in place. I am concerned about millions of batteries in landfills, cars unable to go the distance in adverse conditions causing injury and a nuisance on highways as well as loss of the ability to make a living for auto and gasoline dealers. I am concerned about the loss of free market and freedom to make my own choice because a small group of elites have decided what is best without a majority vote.
