Organization: No

Comments:

I am against full banning of all gasoline and diesel vehicles per this mandate. I am a camper, and haul a heavy unit with my F250. As of now, there is not an electric unit haul the weight I am hauling. Even if they do make a unit, when you put the electric trucks under load, you get at best half of the rated miles. This shortens how far you can travel per day. Also, banning vehicles that are bought from other states should not happen. Why would people want to move here if they can't bring their vehicles? What about all the gas tax money the state will lose? I am not against electric vehicles, but feel it should be up to us if we chose to buy one or not. Not the dictatorship of the government. Thank you for your time.
