

Low Emissions Vehicle Program

2022-R-A-0011

I strongly oppose the 2022-R-A-0011 low emissions vehicle program . We are just not ready for electric vehicles on a large scale . To have them forced down our throats is not acceptable to most people , a huge drain on the electric grid , a huge cost to implement (which will be passed on to the consumer i.e. higher taxes , fees , etc) , unaffordable for most people . The economy is already in a tailspin from bad policies implemented by the elected politicians and unelected bureaucrats . Stop the madness .
