Comments:

Seems the Copying of California's emissions regulations is our goal for De.. The Electric Vehicle is front and center. I understand that EV's are not really any more enviromentally friendly than our gas or diesel vehicles. Also, the expense of adding all new EV charging stations -everywhere and to each home to be provided at who's expense? The extra load, eventually will be a heavier load on our power grid - look at Texas to start. Electric vehicle's will have their place. What is all the rush? Mandates should be replaced with -Gradually, we can accept EV's as an option -not a replacement for Gas or diesel vehicles. Thanks for listening.
