Comments:

I know that we need to have lower emissions as climate change is affecting our state and has become more evident year after year. The sea is rising and diminishing the size of the beaches, more flooding is taking place each year. I am in favor of curtailing the sale of new high-emission vehicles and offering incentives to buyers of new vehicles to help alleviate some of the effects of climate change in our state. The opposition seems to be because they do not understand that used cars are not affected by this mandate. In looking at the electric car industry, there are more and more manufacturers making electric and hybrid cars which will eventually reduce the cost. In addition, more charging stations are being planned to alleviate the problem of charging the cars. Therefore, I am in favor of this new proposal. Thank you for listening.
