Comments:

I find no real reason for state officials to insert themselves into what type of transport the public uses. As for Electric Vehicles in particular, I would like to know; 1. How will electricity be generated to meet the demand that will be required? 2. Where and how will the batteries from these vehicles be discarded when they are no longer serviceable? 3. Who will pay for the lost value of gas powered vehicles that this mandate will cause? 4. What is the cost of lost jobs from the gasoline industry? 5. What is the perceived good of this initiative which will create the above mentioned ills to the people of Delaware.
