Comments:

Ask yourself how are the EV batteries being recycled? How far can you drive on a EV battery charge? How much does a replacement battery cost? How much does it cost to install a battery charger at your home? Do you live in a community with a HOA? Will they approve it? How will installing a EV charger in your home affect your neighborhood? The answers to these questions are NOT being answered by those pushing their green agenda. How is it more environmentally friendly by burying lithium batteries in the ground? Simple...it's not!
