Comments:

Totally against a Mandate for the Electric Vehicles requiring all to have to own. Against the ban of the sale of new fuel-powered cars, trucks, and SUVs in Delaware. Your manadate: "By Fall 2034, the regulations would require all new vehicle sales to be ZEVs, prohibiting the sale or registration of new gasoline and diesel light vehicles" will not only harm all who are not the rich elite but also all businesses. Locally we have already heard of the fires involved with these vehicles and the difficulty to extinguish these fires. Requiring a Business and new housing to have outlets for these vehicles will only make it more expensive and difficult for those being able to purchase in the future with the economy already causing problems. Travel will also be difficult when making trips outside of your State due to having to charge these batteries -even with chargers set up people will be lined up waiting to recharge the battery to be able to move on. We the People do not want these Electric Car Mandates. I suggest that DNREC vehicles ,Government , State vehicles and all those who are for these vehicles do the trial and show us how well this idea works But do not Mandate these vehicles for everyone else. Thank you for your time.
