DNREC

I'm unable to attend your meeting today about the EVs. I DISAGREE 100% with this mandate. Govt should NOT mandate this. The Battery technology, infrastructure, power grid and mining capability is not ready for such a mandate. I agree with cutting emissions but how about it you start with EVERY state building install solar panels.

The power grid will need a major and costly upgrade with much larger power lines, and switches let alone the increased power plant emissions to achieve 100% EV.

Again, I disagree with this plan
