In reference to the EV vehicle it should be left up to the person who is buying a vehicle whether they want an EV, gasoline or diesel powered vehicle. DNREC, one of the most corrupt agencies in Delaware should not be involved. It's a shame it has come to this. By the way. One might want to consider shadowing California which has become a shit hole over the past few years at the fault of the democratic politicians. Your decisions now will come back to haunt you in the future. Do not drive Delaware further into the ground. Let the people make their own decision. If you do not agree with the comment then research the facts. EV cars are more harmful for the environment than gas and diesel. You would think being an environment agency you would know this. I'm sure the people reading these comments will turn a blind eye to posts such as this. Again. Corruption in Delaware all across the board. Those that know; know.
