Comments:

My wife and I are totally against this mandated nonsense regarding low emission vehicles. The economic costs to the citizens of Delaware will be enormous, especially so in Sussex county where many residents are on fixed incomes or low wage incomes. Not to mention that the electrical grid in this state is far short of the needs to support such a mandate. Low wage farm and poultry workers barely make ends meet now. How can they possibly afford to replace their current vehicles with these high price EV's? How do they get to work? We have made tremendous strides in producing far cleaner running vehicle than those I grew up with. Let's stop this insanity now.
