Comments:

This proposal places a huge financial burden on Delaware residents. The ability to charge a car in the city is logistically difficult is only one aspect of this. There is also the impact of toxic chemicals, uncontrolled fires from defective and or damaged batteries in high density areas. As a long distance commuter to neighboring states I dread the impact this would have on my mobility, time and finances. Charging my vehicle would occupy an inordinate amount of time and truly multiple the complications in the event of emergency evacuation Please do not mandate EV and impose more burdens on citizens Thank you
