Comments:

I am against this mandate for a variety of reasons including cost, supply chains, national security issues, consumer choice and freedom, reduced ability to travel distance, environmental impacts of mining, DNREC's lack of expertise in many of these areas and many other reasons. Given the depth and breadth of the potential impacts, if it is to be put in place it should be voted on by the Delaware General Assembly via legislation and signed by the Governor. This is how accountability is achieved. I've put this question to legislators and they shrug their shoulders as if to say they can't do anything about it allowing them a free pass.
