Comments:

After research on this topic: 1. General Motors, Nikola Motors, Nio and Toyota will likely go bankrupt by 2030 because of their investment stakes in EVs. Tax payors will likely pay the bill. 2. EV system will be rolled out in a geo-fenced fashion and trackable like a cell phone. 3. EV fires are much harder to extinguish and may need more water to extinguish. Fire personnel worldwide are attending new training to address the lithium-ion-fires. Please DON'T MANDATE EVs!!! Let the people decide, please!!!!
