Comments:

Restricting what Delawareans can purchase is un-American. We live r in a free economy. Dictating what we can or cannot buy is communities. Any governor that promotes such regulations must be communist! This is a free country, if electric vehicles are efficient, powerful, and dependable let the free market decide what Americans buy. If government wants to promote emissions free vehicles focus on improving our infrastructure for electric and hydrogen vehicles first. This is not a socialist country govener!
