Hello, I'm writing with grave concern on the proposed mandates for NO emission vehicle program. I'll attempt to capture my thoughts in the below bullet points: 1. This limits consumer choice. Capitalism is based upon market driven products and services that best serves. The government has no business determining anyone's right to choose. I'll use abortion as an example. 2. What is the plan to ensure the infrastructure is in place to support all of these EV's?.....Charging stations, home conversions, energy grid to supply a potential demand. 3. How are poor people going to afford these EV's? 4. This will limit my freedom to move about as I choose. 5. What type of EV does the governor drive as a government vehicle and a personal vehicle? (this is about leadership and setting the example) 6. Who is the governor taking his orders from in an effort to be so energetic about this. 7. Where will Delaware DOT get the taxes they are accustomed from fuel taxes? 6. Way too many unanswered questions to list them all. Where is the governor, he doesn't seem to get out in public very often. 7. How do I schedule an in person meeting with the governor?
