Dear sirs, I'm writing to you in opposition to the EV mandate. My reason is simple. For one we have not prepared for such transition. Our power grid is incapable to handle such increasing. We have not been building new power plants. Indian River plant is planned to shut down. Second, we need (the people) whether we want EV vehicles. Safety concerns top off the important points. What about the number of people being unemployed. Have other concerns as well. Sincerely, Aubrey Brown 507 Center St, Harrington, DE 19952.
