How are the lower income families going to be able to afford and purchase one of these overpriced electric turds? Did you even think about that before opening up this idea that everyone should drive an electric car. Making people do things they don't want to do is not smart. All of this is from government representatives that are out of touch with reality on how the real world is.

The last time I looked this is not California, We do not have the same problems with emissions as the folks on the west coast.

Sorry but i don't support your ideals,
