Comments:

to DNREC I am registering my disagreement with Delaware's program to eliminate gas powered engines to be replaced by electric. This program is not based on evidence, only a political opinion that I and many other Delawareans disagree with. Further, it is following the direction the state of California is taking that by their experience has proven to be fraught with problems. It is also undemocratic given the fact that the executive branch is forcing issues on the citizens by ignoring the legislative process. It is unconstitutional to override our freedoms by forcing lifestyle changes on citizens that we have not chosen for ourselves. Stay out of our garages, our kitchens, our homes!
