Organization: No

Comments:

I am supportive of many efforts to reduce our carbon footprint and halt what is happening to our climate, but am very concerned about this proposed change to all electric vehicles. I do not understand how anyone will be able to travel outside of Delaware with an EV without national infrastructure. I believe this will take many more years to change the way people think about their travels and far more years for other states to build their infrastructure. This should not be done by department regulations nor by a Governor mandate, it should go through the regular legislative process with hears and presentations from both sides (pro and con) so citizens can become more informed. Thank you, Evelyn Keating 3 Westwoods Blvd. Hockessin, DE 19707
