I am against being forced to buy an EV vehicle. I am a senior citizen on a fixed income and unless you are buying this vehicle than I prefer to keep my 4 cylinder Subaru that gets me to the Doctors and out to do my errands. Don't even get me started on the cost to change my garage to recharge an electric vehicle.

Shame on all of you for not thinking of the majority of Delawareans that live paycheck to paycheck. There are many more of us than those with money that can afford this. I worked my whole life as a Delawarean and this is being shoved down our throats without any consideration for the majority of Delawareans that can't afford this. I do not want this passed for many reasons but mostly is they are way to expensive and at times dangerous.
