Comments:

I am against this program. Personally I don't feel that this will benefit us in the long run. I believe it will be more costly and damaging to the environment. I am also against the elimination of gas ranges. Why would we ever want to do what California is doing? I firmly believe that Foreign Countries have the biggest impact on Climate Change and until the World puts pressure on the to make changes we are spinning our wheels. China and India are the 2 major Counties.
