Not a very good idea!! at the present time. No one thinks cradle to grave. Where does all the electricity come from? How much of the earth is permanently scarred in mining? Where are spent batteries buried or reprocessed? WHO IS MAKING ALL THE \$\$\$\$ FROM THIS NATION SCARE?? Some say "follow the science ". I am a scientist and on this issue I say "follow the money " 1 degree C temperature rise by the end of this century is nothing.
