Comments on 2022-R-A-0011: Low Emission Vehicle Program

Name: Katherine Degliobizzi

Phone: (302)239-5437

Email Address: kdegli@verizon.net

Organization: My Family and future generations

Comments:

Absolutely NO to forced Electric Vehicle: (1) Their batteries need RARE METALS! The batteries are very prone to catching on fire. MOST importantly, as much as Old Joe wants it... AMERICANS/DELAWAREANS do not want, NOR WILL BE FORCED TO be tied to CHINA for its EV participation and NOOSE around our necks. (2) Making the vehicle creates much adverse emissions. (3) VERY EXPENSIVE and at this TIME especially...the average person is drowning \$\$\$\$ , NOT in position to buy food, yet alone a new vehicle. (4) Electricity is expensive in itself...People do not need another UTILITY Company to extort us, at anytime they want and with NO recourse for the consumer. Additionally, MANY people do not have the means NOR the physical property to have "their own" charging stations and PUBLIC charging stations are more pricier. NOT RIGHT AT ALL. Delaware DOES NOT have to be a follower! Although Delaware was the "First State", this issue need to go away and should not be pushed down the throats of the people. ENOUGH! NOW IS NOT THE TIME!
