Please vote against this bill! I'm definitely not against electric vehicles but to mandate this only makes those against it dig their heels in even harder. Why don't you give incentives rather than mandates? Mandates cause anger and frustration. Incentives bring people on board without all the anger and dissension. It may take a little longer but the unity will be well worth the effort. And our earth is not going to fall apart with a few extra years for people to get on board. Please reconsider your forcefulness on this issue. Thank you for listening. Katy Geshay
