We ask that there be no EV mandate put upon the citizens of DE.

My husband and I will not be able to afford nor finance an elect vehicle and to install an adequate charging system in our home is also not financially feasible for us. Also, we certainly will not be able to buy a new, very expensive battery when the original battery fails.

We know the infrastructure that is required to keep the electric vehicles charged will be a long time coming. Why are electric vehicles being pushed on us

Again, we ask as residents of Delaware please do not mandate electric vehicles for any of us.

Thank you for allowing us to comment on this,
