Please consider this my formal objection to the proposed EV Mandate. I am disappointed that the State of Delaware and DNREC would ever propose such a legislation. I totally disagree with my state telling me the type of vehicle I have to purchase. I am not opposed to electric vehicles for those that want them, but to dictate to the entire state is in my opinion a dictatorship. Have you even considered the harm the batteries from electric vehicles will cause?? Our state can not begin to handle the infrastructure now, so imagine when everyone has to power up at the same time. Over extended power grid, clogging of parking lots, time spent waiting for a charge.....how can you even???? What about farm machinery, lawn mowers, trucking companies? That is not counting the cost of the vehicle and the repairs. Oh and.....charging stations for homes? Imagine the cost and the electric bill. We don't even have internet accessible for all homes, and you want to move forward with something like this. I VOTE NO!!!! Please reconsider this outlandish objective and think realistically. Listen to your public for once. Marcia Elliott 34023 Gordy Road Laurel, Delaware 19956 302-519-3366
