I am a resident of Delaware and I have attended both DENREC's on line meetings and in person meetings opposing the proposed Low Emissions Vehicle Regulations. It is painfully obvious that "We the people" of Delaware are strongly opposed to these "California" regulations. The proposed regulations have numerous technical hurdles, are not well thought out, absurdly expensive and are discriminatory. They will cause personal and economic harm to the citizens of our state. I implore you to abandon the current proposed regulations and to find new solutions to your environmental concerns.
