Organization: No

Comments:

1). Mandates are not what any of us want 2) This mandate has not been totally thought through and researched. 3) Delaware is such a small state. What good we do ecologically will not make the tiniest dent in the world's air quality concerns. 4) Buying Lithium and Cobalt from China and third world countries to produce these batteries only encourages said countries to abuse children as they force them to be slave laborers. Additionally, the environmental disaster that takes place in order to extract the lithium and cobalt is not being considered. 5) There is not adequate infrastructure to support this program. 6) Battery disposal is not being addressed. 7) This is not supported by the majority. Put it to a referendum to get a true view of what the state's population thinks.
