Comments on 2022-R-A-0011: Low Emission Vehicle Program

Name: Robert Creamer

Phone: 3022364351

Email Address: rtcreamer2@gmail.com

Organization: no

Comments:

The CO2 Coalition has stated "For the last 140 million years, CO2 levels fell precipitously and steadily to within about 30 ppm of the 150 ppm "line of death" below which plants can't survive. Both the relatively short-term data from ice cores and much longer-term data going back 140 million years (Berner 2001) show an alarming downward trend toward CO2 starvation. The release of carbon dioxide by the use of fossil fuels has allowed humanity to increase concentrations of this beneficial molecule, and perhaps avert an actual CO2-related climate apocalypse." To suggest we need to mandate low emission vehicle and/or reducing CO2 emission to counter to where we need to be heading. I am writing therefore to voice my oppisition to the mandate. S
