Comments:

I support the EV mandate, and believe it is part of your job to take this step, as well as many others, to ensure we have clean air and a livable world for the next generation. I remember the grey skies over cities in my youth before the EPA existed. Mandates like this one CAN and DO make a difference. Too many people take our current clean air for granted, but if we did not make changes decades ago, things would have been vastly different. Please continue your mission to take care of our natural resources including the air we breathe and a livable world. Vote YES on the EV mandate as a great first step.
