Dear Sir or Madam;

The state of Delaware's EV policies are in shambles. I purchased a Jeep Wrangler Hybrid yesterday and was told that I would not receive a Delaware rebate, but I would have, if I bought it on April 30<sup>th</sup>. I received the Federal credit for the purchase. Currently, only 31 vehicles receive the Delaware credit and only 8 of them are American companies. If you want to promote EV use, the rules should be consistent, not the patchwork of inequitable rules you currently have that discourage and frustrate consumers.

David
